The MAILING DATE of this communication appears on the cover sheet with the correspondence address					
THE REPLY FILED 29 July 2004 FAILS TO PLACE THIS Therefore, further action by the applicant is required to average final rejection under 37 CFR 1.113 may only be either: (1) condition for allowance; (2) a timely filed Notice of Appea Examination (RCE) in compliance with 37 CFR 1.114.	old abandonment of this applica) a timely filed amendment which	ntion. A proper reply to a places the application in			
PERIOD FOR REPLY [check either a) or b)]					
 a)	Advisory Action, or (2) the date set forth later than SIX MONTHS from the mailing FILED WITHIN TWO MONTHS OF TH	g date of the final rejection. IE FINAL REJECTION. See MPEP			
fee have been filed is the date for purposes of determining the period of fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of (2) as set forth in (b) above, if checked. Any reply received by the Office timely filed, may reduce any earned patent term adjustment. See 37 C	of extension and the corresponding amount the shortened statutory period for reply of the later than three months after the mail OFR 1.704(b).	unt of the fee. The appropriate extension originally set in the final Office action; or ing date of the final rejection, even if			
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.					
2. The proposed amendment(s) will not be entered because:					
(a) They raise new issues that would require further consideration and/or search (see NOTE below);					
(b) ☐ they raise the issue of new matter (see Note below);					
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or					
(d) They present additional claims without canceling a corresponding number of finally rejected claims.					
NOTE:					
3. Applicant's reply has overcome the following rejection(s):					
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).					
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See the attached examiner's remarks.					
6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.					
7. For purposes of Appeal, the proposed amendment(s) a) will not be entered or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.					
The status of the claim(s) is (or will be) as follows:					
Claim(s) allowed:					
Claim(s) objected to:					
Claim(s) rejected:					
Claim(s) withdrawn from consideration:					
8. The drawing correction filed on is a) approved or b) disapproved by the Examiner.

REMARKS

- 1. Applicant argues that using a look-up table on source data in accordance

 Johnson in the device of Aoki is contradictory to the intended purpose of Aoki to

 modulate the source data so that the three least significant bits are applied in the first

 field of a frame and three most significant bits are applies in the second field of a frame

 for the purpose of generating a gradation signal for driving an image display. However,

 Applicant did not explain how or why the contradiction occurs. As indicated in the

 previously office action, the examiner use only Johnson's concept of using a look-up

 table for modulating data information in Aoki's display device, not the use of a previous

 field frame or correcting a field frame taught by Johnson
- 2. Applicant argues that Hirota is directed toward the use of a black data field in a frame for the purpose of preventing horizontal cross-talk. Thus, combining Hirota with Aoki would add a black data field to the first and second fields taught by Aoki. Applicant then states that such an additional black data frame contradicts the intended purpose of Aoki in generating a gradation signal for driving an image display. Applicant further states that there is no provision in the circuitry of Aoki for an additional third black data field while generating a gradation signal. The examiner disagrees with applicant's arguments because the test for obviousness is not whether the features of one reference may be bodily incorporated into the other to produce the claimed subject matter but simply what the combination of references makes obvious to one of ordinary
